

NutraSoft Pelletized Gypsum is better than pulverized gypsum products normally used because of its fine grind. A finer grind causes the product to work faster and more effectively. NutraSoft Pelletized Gypsum is first ground to a flour-like powder and then is made with a moisture-activated binder to form dust free, fertilizer-sized pellets that quickly dissolve when added to the soil.

Apply NutraSoft Pelletized Gypsum to loosen those heavy, hard-packed soils* allowing moisture and air to penetrate and move freely in the soil, improving conditions for hearty lawns and gardens.

Apply NutraSoft to counteract the harmful effects of ice-melting salts and repair pet yard spots. Gypsum is pH neutral and will not increase soil pH and may lower (or reduce) soil pH of unproductive, highly alkaline sodium soils. NutraSoft contains sulfur and calcium, two essential nutrients for plant growth.

ADVANTAGES:

- Fast and easy to use - no mess.
- Loosens hard-packed soils*.
- Increases nutrient availability - stretches your fertilizer dollar.
- Counteracts salt damage.
- Repairs unsightly pet spots in your yard.
- Spreads accurately with any spreader.
- Supplies vital nutrients - calcium and sulfur (Test your soil to determine calcium and sulfur requirements).

DIRECTIONS FOR USE:

NutraSoft is non-burning and non-toxic to humans, animals and plant life, when used according to label directions. For best results, water the soil well after application.

New Lawns: Apply 40-100 lbs. per 1,000 square feet before seeding. Rake or till thoroughly into top 3" of the soil. Use higher rate for high clay soils.

Established Lawns: For corrective action, apply 25 to 40 lbs. per 1,000 square feet in the spring and again in the fall. Use 80 to 130 lbs. per 1,000 square feet of this product on higher clay or heavily compacted soils.

Maintenance applications should be repeated 1-2 times per year, spring and fall, at a rate of 6 to 12 lbs. of product per 1,000 square feet to maintain proper soil conditions.

Gardens: Mix in 10-20 lbs. per 100 square feet and water thoroughly.

Roses: Place 1-2 cups around the bush in both Spring and Fall.

Trees, Shrubs and Flowers: Apply 2-4 cups around the base of smaller plants. Apply 4-6 cups around the base of larger plants.

Winter Salt Damage, Fertilizer and Pet Spots (Corrective Applications): Apply 20-40 lbs. per 10 square feet for salt damaged areas and apply 1/2 - 3/4 cup per square foot for small spots.

Compost Aid: Spread out approximately 2 cups over each garden cart load as it is dumped into compost pile. Turn pile daily, adding 2 more cups per day until complete (approximately 1 1/2 weeks).

APPROXIMATE SPREADER SETTINGS			
Settings per 1,000 Square Feet			
	Setting		
Spreader Make	10#	20#	40#
Scotts Accugreen (Drop) . . .	10	16	16**
Scotts Speedy Green	8	13	18
